

Lamarre and Sons Inc. is a family owned and operated corporation formed in 1990. We are state licensed structural steel and sheet metal contractors specializing in steel fabrication, equipment installation, and sheet metal fabrication. With over 20 years in the millwright industry we have obtained vast knowledge in repair and installation processes. Our goal is to maintain a long lasting relationship with our clients based on exceptional design and cost effective solutions that meet our clients' needs.

BY RAPIDAIR

AIR PIPING SYSTEMS

RapidAir® Modular Air Piping Systems

Lamarre and Sons have partnered with RapidAir® as the premiere supplier of air piping which are used in our medium to large commercial projects. The combination of cost, durability, and overall quality has led to exceptional installations. Whether you are looking for commercial or industrial options, we're here to make it easy to get exactly what you need, when you need it.

On-site installation and modifications has been our specialty. To list a few, we have completed conveying systems, piping systems, ducting systems, bag houses, as well as complete facility construction. We employ a team of hard working and safety conscious individuals. The company maintains an excellent safety record and does so by implementing proper training and regular safety meetings. We understand and abide by all rules and regulations set forth by O.S.H.A, M.S.H.A and other organizations.

Over the years, we have established a reputation as the go-to company for large scale repairs. We have worked with numerous companies in the aggregate and concrete industry repairing and replacing wear-and-tear damage. Our extensive experience in installation projects has made us equally efficient in removal and repairs. We have faced seemingly impossible repairs and deadlines, but have always completed them on time.

INSTALLATION

With over 20 years of experience in a wide variety of industry, our design team has the ability to accommodate any large or small project. Our design staff will consult with our customers on projects to minimize cost and optimize time. Our experience in different disciplines and industries have assisted us in creating efficient and cost effective solutions for your project needs. We'll ensure that your completed project are up to your quality standards.

STAINLESS STEEL
PLATFORM FRAME

REPAIR

We are licensed in sheet metal and structural steel and can fabricate everything in between. Our fabrication facility has expanded over the years to provide a wide range of capabilities. These capabilities include: shearing up to half inch plate, forming up to quarter inch plate, punching, rolling, drilling, and much more. Our staff of fabricators and welders take pride in their work and quality assurance is maintained through every step in the fabrication process.
